

Keynote Sessions & Technical Sessions Virtual Live Online Only Option Sept. 19-21

*Please note: All sessions take place in Pacific Time
(Sessions as of 8.1.22)*

This year's event will offer an in-person and Virtual Live Online Only Option allowing us to deliver quality educational programs directly to you as we continue to navigate through this new era of safety.

When you register for the live online only option, you'll have access to:

- 5 Live-Streamed Keynotes (available live only)
 - Opening Session
 - The Campbell Institute Forum
 - Occupational
 - Diversity, Equity and Inclusion Panel Discussion
 - Leadership
- 8 Live-Streamed Technical Sessions
- 60 day on-demand access to above program after the event (Excludes Keynotes)
- Ability to earn CEUs/recertification credits

Pricing

NSC Member: \$129

Nonmember: \$179

Monday, September 19

9:00 a.m. – 10:30 a.m.

OPENING SESSION

Being Resilient and Adaptable in Time of Change and Uncertainty

Massimino's second space flight was one of the last of the Space Shuttle Program. It was time for NASA to retire the shuttle and move on to the next phase in space exploration. The next phase included flying exclusively on the Russian Soyuz for a few years, and working with commercial companies to provide launch services in the future. Many at NASA did not want to accept these changes. But the last few years have shown that those who accepted these changes thrived, while those who resisted are no longer contributing. We may not like the new world we are now living in that has forced us to change the way we do business. But by accepting change and knowing that change can provide unseen opportunities, we can still shoot for the stars.

Mike Massimino, Former NASA Astronaut, NY Times Bestselling Author, Media & TV Personality;
Columbia University Professor

Monday, September 19 (cont'd)

11:00 a.m. – 12:00 p.m.

THE CAMPBELL INSTITUTE FORUM

Seize this Moment

EHS professionals have a seat at the table and your CEOs attention. The last two years have put workplace safety in the spotlight. Join this conversation to hear CEOs provide advice and insights on how to use the spotlight to influence the future of EHS for your organization.

1:00 p.m. – 2:00 p.m.

SESSION 1: Coaching The Secret Power of Safety Leaders

Safety professionals love to fix and solve problems, often with a hands-on approach – but what if that's the worst choice you could make? Enabling the dependency of your shareholders, workforce and C-suite only makes you work harder and keeps you behind obstacles instead of leading the way. What if you mastered the magic power of coaching and inspiring others to problem solve on their own instead of asking and waiting for you to fix their safety challenges? In this session, we'll talk about why coaching your workforce, team and executives is one of the most influential leadership solutions available. Let's work smarter, not harder.

Regina McMichael, President, The Learning Factory, Inc.

2:30 p.m. – 3:30 p.m.

Management Leadership

Advanced

SESSION 28: Safety from the C-Suite: Leading People Safely in Today's Business Environment

Hiring and retaining the best employees. Customer safety requirements. Rising insurance costs. A hostile litigation environment. To meet these challenges, today's executive must know how to lead people safely. This cannot be delegated. Organizations that make prevention and risk management core competencies enjoy a sustainable competitive advantage over their peers. In this session, you'll learn about ensuring safe outcomes despite tremendous production pressure, tools and technology to capture leading indicators, how to create frontline engagement around safety, creating processes your teams can understand, and the essential role of "just culture" to ensure safe outcomes.

Brian Fielkow, Consultant, Brian Fielkow & Associates

Monday, September 19 (cont'd)

4:00 p.m. – 5:00 p.m.

SESSION 39: Lead Like Lasso: Developing Your Next-Generation Leadership Star

If Coach Ted Lasso has taught us anything through the first two seasons of his journey with AFC Richmond, it's to believe in who you have in front of you and work to develop them into the next generation of star. This session is for current and future organizational leaders who want to build a culture that nurtures leadership development in the context of today's multigenerational workforce. You'll learn to distinguish the strengths and opportunities for growth within your current team, formulate strategies to bridge gaps within your workforce to build up the next generation of leaders, and develop a culture in which knowledge transfer and leadership development are the norm.

Gabe Encarnacion, Vice President BBL Safety

Wyatt Bradbury Meng, CSP, CHST, CIT, Hitachi Rail

Tuesday, September 20

8:00 a.m. – 9:30 a.m.

OCCUPATIONAL KEYNOTE

OSHA Update

Get the inside scoop as OSHA Assistant Secretary Douglas Parker discusses what is in store for OSHA. Already, OSHA has been active on COVID-19 interventions, heat illness, workplace violence and other topics. Hear first-hand about what more is to come.

Douglas L. Parker, Assistant Secretary of Labor for Occupational Safety and Health

10:00 a.m. – 11:30 a.m.

DIVERSITY, EQUITY & INCLUSION

Panel Discussion

Diversity, Equity & Inclusion (DE&I) is an important component of safety and health and is increasingly integrated into workplace safety and health plans. While we do know Hispanic or Latino workers experience a fatality rate 36% higher than white non-Hispanic workers while black or African American workers have a rate 6% higher. There is a lot we do not know. Also, the link between DE&I and safety outcomes may be unclear for some professionals.

We have assembled a stellar panel to facilitate an extended conversation on the topic of occupational safety and health and DE&I. Join us for part of all of a 90-minute presentation.

I David Daniels, Ph.D., CSD, President/CEO, ID2 Solutions, LLC

Ricky Gonzalez, Data Scientist, Directorate of Enforcement Programs Occupational Safety and Health Administration U.S. Department of Labor

Ken Kolosh, Manager of Statistics, National Safety Council

Douglas Parker, Assistant Secretary of Labor for Occupational Safety and Health

Tuesday, September 20 (cont'd)

2:00 p.m. – 3:00 p.m.

SESSION 54: Is Your Safety Management System Out of the Loop?

Even if your safety management program has robust technical systems and rigorous training, numerous incidents may occur if you fail to properly manage human factors. This session will demonstrate how human factors are the most challenging obstacle to maintaining your safety management systems. It will also review a real-world case study of how one company was able to integrate elements of human factors management into its SMS. You'll learn how to use a flexible framework that can strengthen human and organizational systems with the use of two "learning loops."

Tim Page-Bottorff, Senior Safety Consultant, SafeStart

3:15 – 4:15 p.m.

SESSION 80: Total Worker Health: Coordinating EHS and HR for World-Class Programs

The COVID-19 pandemic shifted employer/worker relationships and has required reevaluation of worker needs – including mental and physical health issues – in addition to traditional safety and health protections. The workplace and workforce are changing, with increasing focus on the employer's role in Total Worker Health. TWH, a NIOSH initiative, also intersects with effective programs on diversity, equity and inclusion as well as environmental, social and governance. These benefit the company, its most essential human resources, its community and even shareholders. TWH initiative is a starting point, and new consensus standards can help guide program development. During this session, we'll discuss how to effectively partner safety and HR, prepare for the future of the workforce, and implement TWH programs that reflect sound DEI and ESG values.

Adele Abrams, CEO, Law Office of Adele L. Abrams PC

Subena Colligan, Principal Coach, S. Colligan Coaching

4:30 p.m. – 5:30 p.m.

SESSION 90: Melting the Glacier: Overcoming Organizational Stasis

Organizational change doesn't happen overnight. It takes persistence, patience, perseverance and proactive evaluation to begin to chip away at the glacier of organizational stasis. Most organizational change fails as a result of unrealistic expectations. Glaciers calve after years of movement; we must understand that the same applies to our organization. We can achieve greatly only if we're willing to fail greatly. In this session, we'll look at the steps needed to chip away at our glaciers and achieve organizational success.

Rodney Garringer, EDC SP Manager, NAVFAC SW

Wednesday, September, 21

8:00 a.m. – 9:30 a.m.

NEW this year, the Closing Keynote will be a two part experience.

CLOSING KEYNOTE – FEATURING MSD SOLUTIONS LAB INAUGURAL SAFETY INNOVATION CHALLENGE

Part 1: Innovation in a Tumultuous World

Collaborating with unlikely characters to tackle seemingly impossible challenges and finding innovative ways to overcome them, is what Mick and Not Impossible Labs have done for the last 10 years. OK... now introduce a global pandemic. What do we do now? How do we maintain an innovation culture in our very disrupted and strange new world? How do we embrace experimentation as a pathway to breakthroughs? In this conversation, Mick will briefly explain the origin of Not Impossible, the NI design process, and dive deeper into Not Impossible's newest world changing solutions.

Mick Ebeling, Founder & CEO, Not Impossible Labs, Author Not Impossible: The Art of Doing What Couldn't be Done

Part 2: Safety Innovation Challenge Featuring MSD Solutions Lab and Safetytech Accelerator

Immediately following the keynote, the National Safety Council MSD Solutions Lab, will conduct its inaugural Safety Innovation Challenge. This event is in partnership with Safetytech Accelerator – a non-profit established by the Lloyd's Register Foundation with a mission to make the world safer and more sustainable through wider adoption of technology. Challenge finalists will showcase and demo their cutting-edge solutions focused on risk prevention and elimination of the most common workplace injury, musculoskeletal disorders (MSDs).

The top innovations have the opportunity to be piloted by some of the world's leading employers, backed by the support of NSC and the MSD Solutions Lab.

10:00 a.m. - 11:00 a.m.

SESSION 100: Mastering the Four Core Components of Safety Excellence

Based on the surveys and observations used to compile the predictions outlined in the 2015 bestseller, *Forecasting Tomorrow: The Future of Safety Excellence*, authors Mathis and Galloway identified four commonalities among the most excellent organizations in safety performance and culture. This session examines those four components in detail and explores how they synergize to produce excellent results. This workshop leads the attendee on a journey balancing case studies with practical execution guidance that focuses on these four components: the creation of safety strategy, leadership development and alignment at all levels, cultural enhancement, and employee engagement and peer to peer coaching.

Shawn Galloway, CEO, ProAct Safety

SESSION 118: The Silent Killer in Your Organization is ... Your Risk (Not Safety) Culture!

The pursuit of zero fatalities is a noble one, and many solutions are offered. They come in the shape of serious injury and fatality risk management, barriers, bowties and control systems. But those are focused “downstream,” where the fatal flaws manifest, and then it’s too late – you’re endlessly swatting them like mosquitoes. Upstream in the organization we find the “risk” culture, and it’s here where the fatal flaws originate and where they must be mitigated. The extent to which we can clarify and transform the risk culture will determine our success to reach this goal. In this session, we’ll discuss a global elimination of fatalities program in a large corporation that delivered dramatic results.

Corrie Pitzer, CEO, Safemap International
